

Time Calculator

Based on a maximum of 7 x 11 hour days for one person

Your current time allocation parameters indicate you have a maximum of 10% or 7.7 hrs in any given week to allocate to a potential farm purchase if all other factors hold constant

Your previously entered farm preference data indicates that you require on average 9.5 hours of

Based on your revised time data where you decrease off site work from 4 to 3 days per week and subsequent commuting time, your farm commitment can be met with a very small amount of residual unallocated time.
